

Porcelain Veneers

A Veneer is very thin piece of specially-shaped porcelain that is permanently bonded to your tooth.

Advantages of Porcelain Veneers:

- Strong and durable
- Natural appearance
- Resistant to staining

Porcelain veneers are commonly used in creating a new smile. They can transform your teeth and give you the smile of you've always wanted in just a few visits. Veneers can correct the appearance of discolored, chipped, misshapen or crooked teeth and close unwanted or uneven spaces. Our team works with you to ensure that you have an understanding of the procedure and your results.
